SEE WHERE THE SHIPMENT IS IN SECONDS

AutoVentive YMS is a web and Android-based application for automotive logistics. Designed by a team with decades of automotive and logistics industry experience, our YMS leverages leading software and hardware technology to give you end-to-end visibility and analytics on all assets, shipments and workforce activities.

BENEFITS

Employee onboarding – Quickly and efficiently onboard employees in the field with one barcode scan.

Improve safety – Monitor employee driving habits and address safety concerns before they become an issue.

Verify inventory location – Use geofencing to locate and verify inventory, including pre-stage loading lanes.

Real-time rail spotting – See occupied and available bays in real-time without refreshing with the Interactive Yard Builder.

Address :

4401 Fletcher Street, Wayne, Michigan 48184

Tailored to meet the specific needs of your automotive logistics operation.

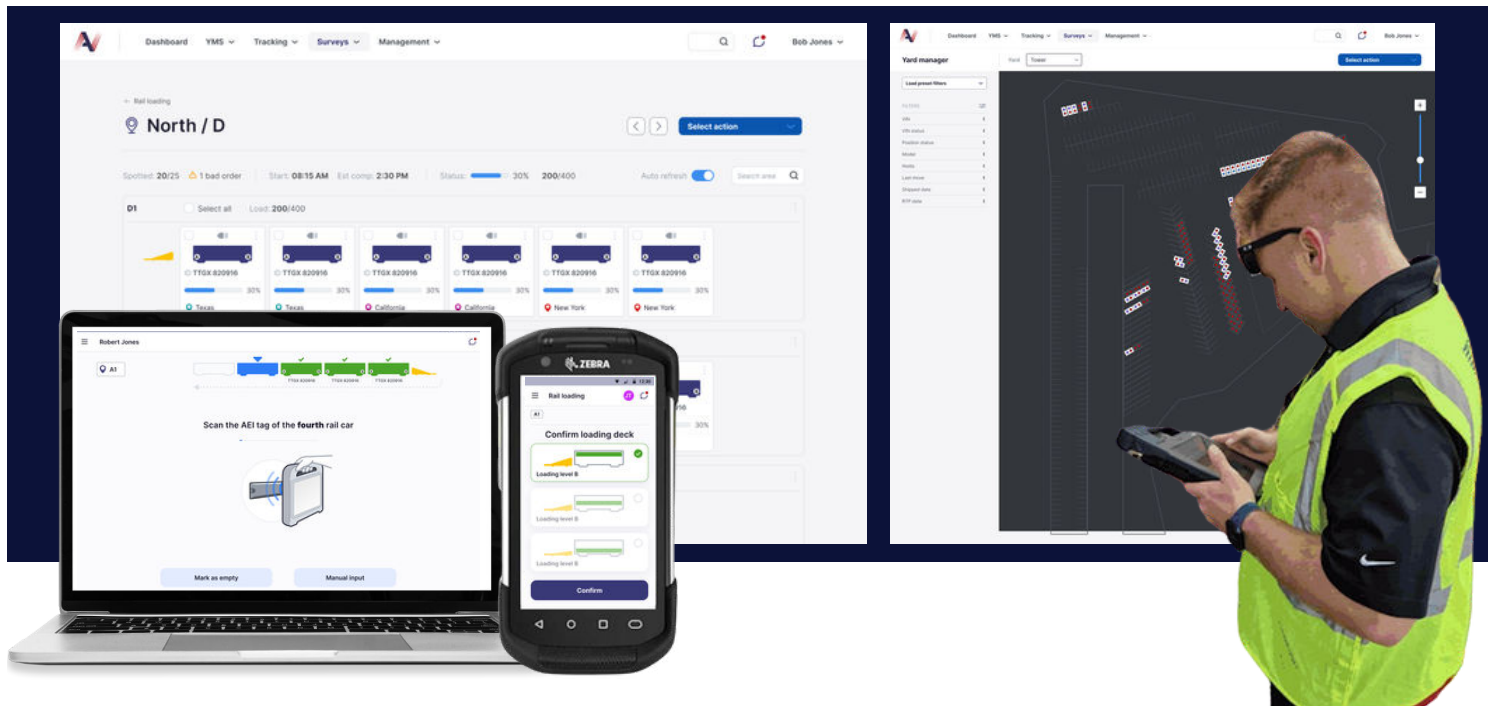

Offers real-time visibility of all yard assets and activities from a single location.

Scales to meet the needs of your business for a single yard or multiple global facilities.

AutoVentive YMS automates and optimizes critical processes within the automotive supply chain, starting when a vehicle leaves the OEM production line until it reaches the dealer or final customer. Our proactive approach to industry advancements and IT solutions means your business stays ahead of the competition.

ABOUT US

AutoVentive is an industry-leading Software as a Service (SaaS) applications developer providing customized solutions to the automotive logistics industry.

The company is part of Liberty Hill Equity Partners, LLC, a Cincinnati-based private equity firm, and Apex Holdings, LLC, a privately held holding company that operates across a breadth of industries and features an expanding portfolio of companies in the automotive logistics and transportation sectors.
